

Resco Inspections+

Collect field data with ease, make decisions with confidence

Equip your frontline teams with a robust digital solution to simplify data collection and reporting. Handle inspections and audits effortlessly, even in remote locations, and create comprehensive reports on the spot, all integrated with Dynamics 365.

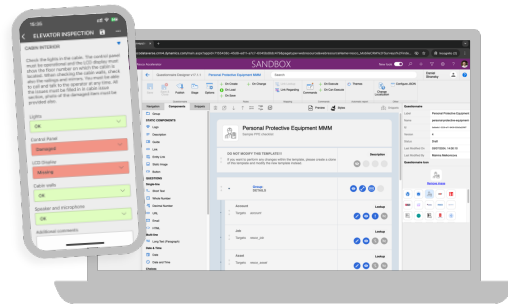

resco

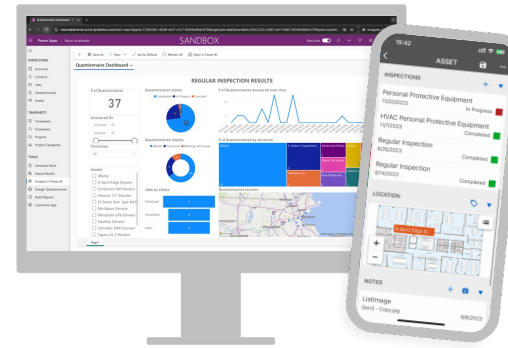

Capture data without limits and deliver reports in seconds

Empower mobile workers to conduct surveys, inspections, or audits with digital forms, even in tough conditions. Create and send custom reports directly from a mobile device or your back-office system.

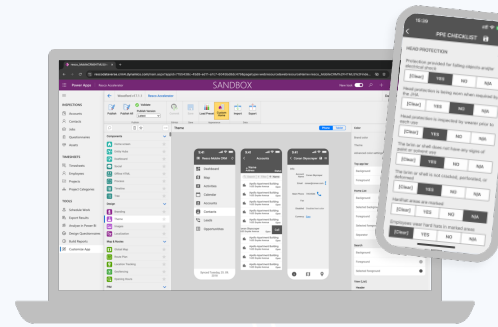

Work faster and more safely with guided workflows

Ensure accurate, consistent task completion with questionnaires that integrate business logic and smart questions. Set up guided workflows without coding.

Make informed decisions based on quality field data

Access up-to-date field data with advanced sync and direct mapping to your database. Combine this data with tools like Power BI for valuable insights.

Be up and running within a day, no coding needed

Start collecting data quickly with native integration of Inspections+ with Dynamics 365. Install in 10 minutes, create questionnaires within an hour, and deploy the same day.

The key advantages

- Native integration
- 100% offline functionality
- Fast & versatile sync
- Questionnaire Designer
- Report Designer
- Mobile-first experience

Southern States **TOYOTALift**

"Resco efficiently transformed what was often a 30-60 minute process into about 4 minutes per form. That's where it accelerated our sales velocity rapidly."

Jason Johnson, Corporate Marketing Manager at Southern States ToyotaLift.

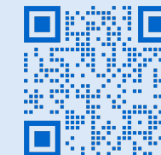

\$350K/month revenue increase

45% increase in process efficiency

Standardized data collection

Experience the power of Inspections+ in just a few clicks

Embark on a guided step-by-step product tour in your browser to see how easy it is to build questionnaires and use them in the field.
